OBJECTIVE

Self-motivated and self-sufficient student with an art background. Interested in Web and App development, focusing on UI/UX Design and Visual Prototyping.

PROJECTS

Sole Developer — Student Registration System using Python

- Created an interactive application for registering users, viewing their information, and managing them using Python and CTkinter
- Showcases read-write functionality for storing and logging user data via .txt file.

Sole Developer — Minecraft-Theme Full Stack Website

- Created a full stack registration website that handles user logins, roles, and dynamic pages.
- Implemented RESTful APIs and a MariaDB backend for data persistence.

UI/UX Designer — Hardware-accelerated renderer using OpenGL

- Designed and implemented a Scene Graph UI for interactive model transformation, lighting parameters, and improved debugging workflow.
- Contributed to asset import, preparing and repairing 3D models (OBJ fixes, mesh topologies, normals) for correct visual results.

SKILLS

- Knowledgeable in version control systems such as Git, and GitHub.
- Experienced in tools such as Figma, Photoshop, Clip Studio Paint, and Blender.
- Programmed using Python, C++, Kotlin, Dart (Flutter), HTML5, CSS, and Tailwind.
- Experienced working and debugging linux environments.
- Familiar with container technologies, e.g, Docker and Podman.

EDUCATION

Bachelor of Science in Computer Science
Lyceum of the Philippines University Cavite, Philippines.

August 2023 - May 2027

Arts and Design - Specializing in Visual Arts
Francisco E. Barzaga Integrated High School

August 2021 - May 2023
